

# Opalescent<sup>Solid</sup>

Opalescent glass is mostly opaque, yet displays a muted, luminescent glow when backlit. Whether a colorful or neutral hue, smooth or textured surface, the rich tones of opalescent glass are a staple in every glass palette.

We've taken great care to present our glass as true-to-life as possible. Since computer monitors and printers vary widely, and may not reliably portray the glass or its color, please use this sheet as a reference tool only. You may want to consider purchasing a glass Sample Set for selecting just the right glass for your projects.
