

The SCORE

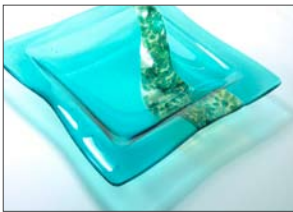

Published Quarterly by Spectrum Glass Company

Issue 108 • Fall 2009

The New Four-Page Score is Here!

As promised, here's our leaner, "greener" four-page SCORE. Page one features our basic news and information — just more briefly — and refers you to our websites for more in-depth information where warranted. Most importantly, the Patterns-of-the-Month are still here — plus the two bonus patterns available from your Retailer each quarter. We hope you enjoy your complimentary issue of the new SCORE. To contribute or suggest a future topic, please send an email to: info@spectrumglass.com. Please put "SCORE topic" in the subject line.

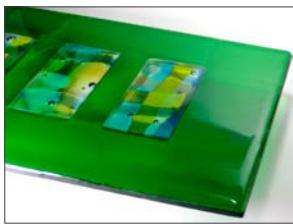

New Product Announcements

Caribbean Blue

System 96® Caribbean Blue is every bit as cool, crisp & inviting as the tropical waters for which it was named.

Caribbean Blue 532-1SF

Fusible Medium Green

The greener the better! This refreshing shade is the perfect compliment to our existing palette of greens in the growing System 96 family.

Medium Transparent Green 1235F

System 96 Wispies

The Wispy family has long been a Spectrum favorite, so we are especially pleased to announce that we have formulated three new Wispies that are unique to our product line — and FUSIBLE.

These System 96 Wispies feature opalescent color ladled into a clear base, using our signature Wispy stir.

The result is a dynamic, yet elegant looking sheet with just the right amount of contrast for both fusing and stained glass work.

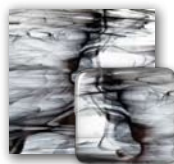

For fusers, the high level of clear glass works well to create endless effects through stacking. Try Wispy-over-Wispy, or Wispy over solids for different looks.

Spectrum Glass presents: The System 96® Glass Craft Program

Project Guide

Criss-Cross Border ▪ Decorative dish

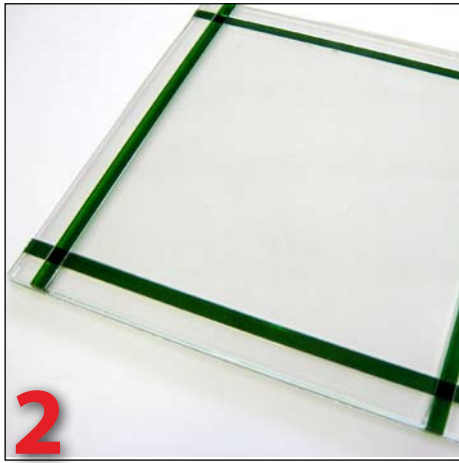

Glass Cutting: **Simple straight lines**

Firing: **Contour fuse**

Use this charming border technique to frame any design — from simple nipped flowers to anything you dream up!

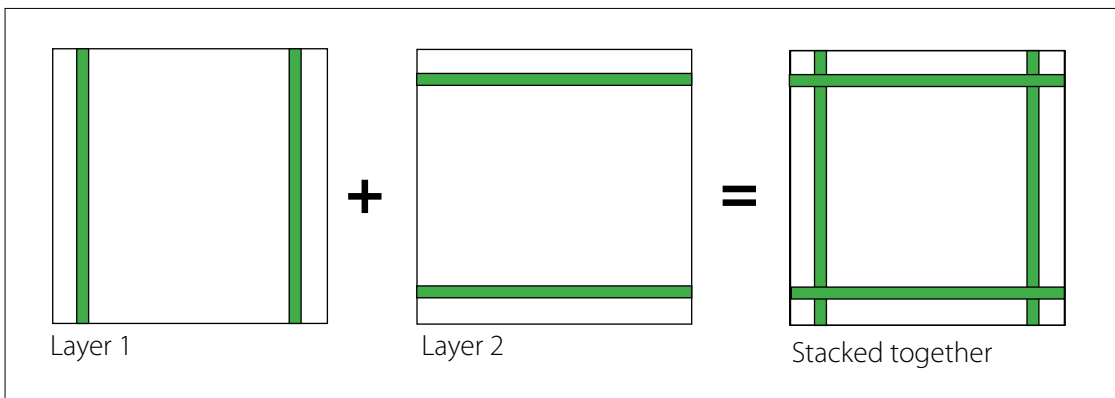

1
Cut four 1/2" x 8" strips from Clear, two 6 1/2" x 8" from Clear, and four 1/4" x 8" from Green.

2
Arrange layers as shown in diagram below. (Layer 2 is identical to layer 1, but rotated 90°.) Stack layers on kiln shelf lined with kiln shelf paper.

3
Nip or cut flowers (or any other design of your choice) and arrange in center. Contour fuse. Slump as desired.

Materials We Used

Glass Colors: 100SFS Clear, 123SF Medium Green, 151SF Cherry Red. Note: 171SF Orange was used for the flower variation shown in step 3.
